

Carbon Reduction Plan

Supplier name: Vizst

Publication date: 16th April 2023

Commitment to achieving Net Zero

Vizst is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022		
Additional Details relating to the Baseline Emissions calculations.		
<p>Vizst has used the calendar year 2022 as its baseline year to measure its greenhouse gas emissions. This has been done independently by Collins McHugh Ltd on the company's behalf with a supporting greenhouse gas emissions inventory report for 2022 using the Greenhouse Gas Protocol Corporate Standard 2015 and UK Government Greenhouse Gas Conversion Factors for Company Reporting 2022 version 2. We will now measure our carbon footprint annually to ensure we continue to deliver against the 2050 net zero target and our own target of halving emissions by 2030 from the baseline figure for 2022. We will explore opportunities to report on wider scope 3 emissions and work with our supply chain on carbon reduction.</p>		
Baseline year emissions: 2022		
EMISSIONS	TOTAL (TCO₂e)	
Scope 1	6.69	Gas (Space heating)
Scope 2	19.51	Electricity (Light and power)
Scope 3 (Included Sources)	0.06	Waste Generated in Operations
	0.36	Water Supply and Treatment
	15.28	Business Travel
	877.85	Downstream Logistics
	141.49	Employee Commuting
	18.52	Staff Working from Home
Total Emissions	1,079.69	tCO₂e

Reporting Year Emissions

Reporting Year Emissions: 2022		
Additional Details relating to the Reporting Year Emissions.		
Baseline year		
Reporting year emissions: 2022		
EMISSIONS	TOTAL (TCO₂e)	
Scope 1	6.69	Gas (Space heating)
Scope 2	19.51	Electricity (Light and power)
Scope 3 (Included Sources)	0.06	Waste Generated in Operations
	0.36	Water Supply and Treatment
	15.28	Business Travel
	877.85	Downstream Logistics
	141.49	Employee Commuting
	18.52	Staff Working from Home
Total Emissions	1,079.69	tCO₂e

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets. We project that carbon emissions will decrease to 544.56 tonnes CO₂e by 2030. This is a reduction of 50%

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2022 baseline.

- Formed an ESG working group with carbon reduction as a key area
- Appointed Carbon Champions at our operational sites
- All employees are required to complete a mandatory environmental awareness e learning module

These measures will be in effect when performing the contract

In the future we will implement further measures including:

- Formulating a carbon management plan to deliver reductions and engage employees.
- Investigating credible carbon offset opportunities.
- Review our procurement policy with respect to the procurement of energy efficient office equipment and appliances.
- Review the company travel policy and encourage staff to assess the need for travel when alternative communication technologies are available and to consider alternative methods of transport if travel is necessary where possible.
- Reviewing of our Scope 3 impacts for potential future inclusion
- Introduce more comprehensive environmental awareness training across the business
- Working towards the completion of achieving an ISO14001 Environmental Management Standard

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors.

Signed on behalf of Vizst:

Richard Betts

Chief Executive Officer
